

Equivalent Quality Control (EQC) Guidelines

According to current CLIA regulations, effective April 2003, the FastPack[®] System contains built-in controls that monitor a portion of the analytical process. Therefore, CLIA regulations allow you to adopt alternate QC guidelines and perform quality control testing less frequently once you have run controls satisfactorily for thirty (30) consecutive days of testing.

The following is a list of the states that do not recognize the current Equivalent Quality Control Guidelines:

California
Florida

New Jersey
Nevada

New York
Pennsylvania

Vermont
Washington
