

ICD-9 Diagnosis Codes for PSA & Testosterone*

PSA: CPT CODE 84153 - TOTAL PROSTATIC SPECIFIC ANTIGEN

185	Malignant neoplasm of prostate	601.9	Unspecified prostatitis
188.5	Malignant neoplasm of bladder neck	602.9	Unspecified disorder of prostate (Medicare Only)
196.5	Secondary malignant neoplasm, lymph nodes inguinal region and lower limb	788.20	Retention urine, unspecified
196.6	Secondary malignant neoplasm, intrapelvic lymph nodes	788.21	Incomplete bladder emptying
196.8	Secondary malignant neoplasm, lymph nodes of multiple sites	788.30	Urinary incontinence, unspecified
198.5	Secondary malignant neoplasm, bone and bone marrow	788.41	Urinary frequency
198.82	Secondary malignant neoplasm, genital organs	788.43	Nocturia
233.4	Carcinoma in situ of prostate	788.62	Slowing of urinary stream
236.5	Neoplasm of uncertain behavior, prostate	790.93	Elevated prostate specific antigen (PSA)
239.5	Neoplasm of unspecified nature, other genitourinary organs. (Use this code for possible malignant nodule of prostate)	793.6	Non-specific abnormal result of radiologic examination, evidence of malignancy
596.0	Bladder neck obstruction	793.7	Non-specific abnormal result of radiologic examination, evidence of malignancy
599.6	Urinary obstruction, unspecified	794.9	Bone scan evidence of malignancy
599.7	Hematuria, microscopic	796.4	Unspecified disorder of prostate (Non- Medicare Only)
600.01	Hypertrophy (benign) of prostate with urinary obstruction (May use this diagnosis for screening)	V10.46	Personal history of malignant neoplasm; prostate

TESTOSTERONE: CPT CODE 84403 - TOTAL TESTOSTERONE

257.1	Postablative testicular hypofunction	600.00	Benign prostate hyperplasia (BHP)
257.2	Other testicular hypofunction	600.90	Prostatism
257.8	Testicular dysfunction	601.0	Prostatitis
259.9	Hormonal imbalance (Elevated testosterone)	601.3	Prostatocystitis
302.70	Psychosexual dysfunction	602.2	Atrophy of prostate
302.71	Inhibited sexual desire	606.0	Azoospermia
302.72	Low libido	606.1	Oligospermia
302.72	Frigidity/Impotence	606.8	Infertility due to extratesticular causes
302.73	Female orgasm inhibition	607.84	Impotence of organic origin
302.74	Male orgasm inhibition	704.00	Alopecia, unspecified
302.75	Premature ejaculation	704.01	Alopecia areata

All diagnostic testing must have both CPT and ICD codes listed in order to receive reimbursement.

A CLIA "Certificate of Compliance" must be established in order to be eligible for medical reimbursement.
